INTRODUCTION.

IN this our '96 CATALOGUE are shown New Designs for the present season with a very brief description of some of their special points.

Our Motto—"One grade only and that the best," will be adhered to strictly, and we can promise our patrons that, with this motto always in view, we shall not put a single vehicle on the market which will not more than compare with any against which it will have to compete as to utility, quality, style and finish.

In the following pages a good idea of our different styles can be had by the cuts and descriptive matter and, as will be observed, we have changed in many ways most of our vehicles, while the standard buggy has been changed in every line. We have aimed at building only such work as would retain for us a reputation which could not be affected, and from a growing trade we are convinced that our vehicles have a good name.

Our goods may possibly be slightly higher in price than others, but if they are you may be sure there is enough intrinsic wearing value added to make them the cheapest in the end. Beneath their handsome exterior is quality which makes permanent customers for us and those who handle them.

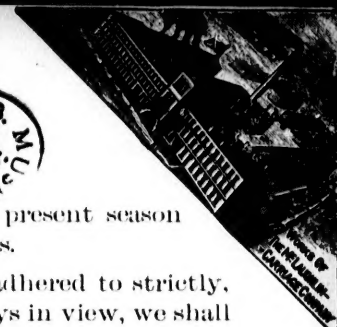

We again thank you for your liberal patronage, and by careful attention to the minutest details in the manufacture of our vehicles we hope to merit a continuance of the same.

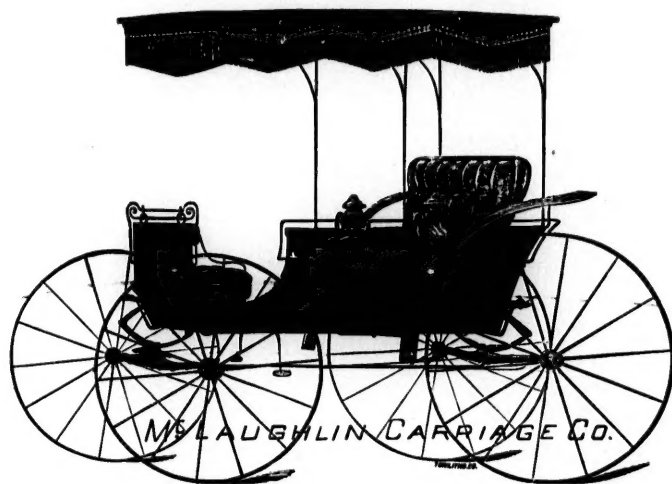

Respectfully yours,

THE McLAUGHLIN CARRIAGE CO.

OSHAWA, ONT.

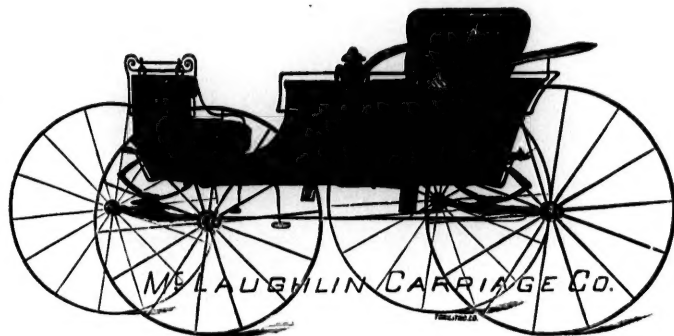

No. 34. CANOPY TOP MIKADO.

The Queen of all Mikados. Finished in natural wood or Painted very handsomely. Well proportioned. Seat has high easy spring back and spring cushion. Sides of body trimmed full length. Solid plated brass rails on dash and body. TRIMMING—Old gold or green all wool cloth or leather. Lined rubber apron; Axminster carpet. Patent washers.

No. 35, MIKADO.

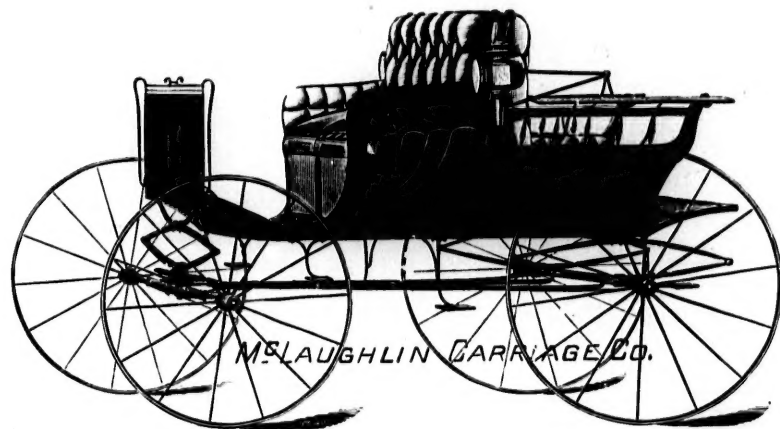

THE LADIES' FAVORITE. THE NEATEST AND MOST TASTY DESIGN ON THE
MARKET.

PAINTING—Body, black or natural wood; Gear, carmine, green or black.

TRIMMING—Hand buffed leather, spring cushion carpet and

floor cloth, rubber apron with pocket. Nickered

brass dash rail. Patent washers.

A GOOD POINT.

You've always looked for a place to fasten the lines when getting out of your carriage to keep them out of the mud and away from the horses' feet.

We've been looking for that place, too. WE'VE FOUND IT! Here it is:—The bottom crook of the rail is a spring and HOLDS THE LINES "TIGHT AS WAX." Do you see the point?

The accompanying cut is an exact reproduction of our '96 Dash and Combined Rail and Rein Holder made of solid brass, plated. We designed these. See how soon some of our friends "the other fellows" will try to imitate us. You'll know whom they copied!

The "Good Point" mentioned above is only one of the many to be found only on a McLaughlin Carriage. Here are some more: Our Patented Single Lever Top—no other so convenient, our Patented Rubber and Brass Noiseless Washers, our Patented Steel Fifth Wheel. There are other good points too numerous to mention here.

You can't make a mistake in buying a McLaughlin Carriage. We make "one grade only and that the best." This is our motto.

ALL ABOUT SEATS.

To make a body on which either an ordinary or a large spring back seat will look graceful, and in proportion, is a task which seems to baffle most carriage makers.

We have succeeded and here produce a Phaeton Seat which, when put on any of our standard buggies, will not make the job appear all seat.

THIS SEAT FITS NOS. 1. 2. 4. 5. 6. 9. 44. 20. 21. 52. 53.

~~~~~  
**IMPORTANT.**—A high solid back moulded seat will be used exclusively on Nos. 1, 2, 4, 5 and 44 this season.  
~~~~~

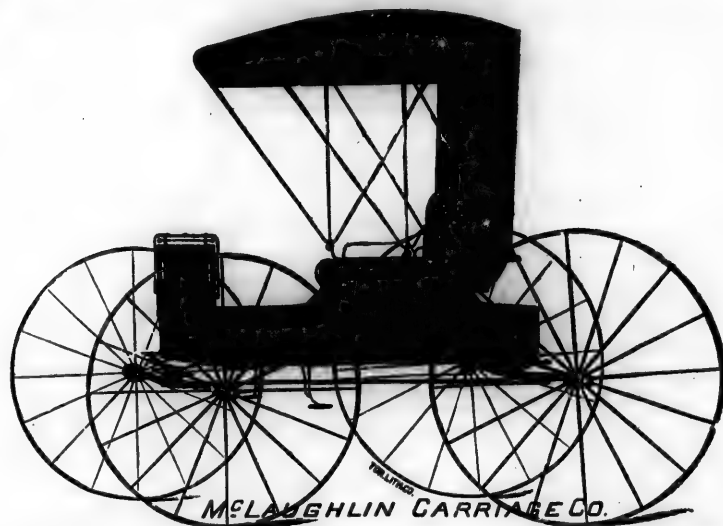

NOS. 20, 21, 52 AND 53 WILL HAVE OUR REMOVABLE TRIMMINGS AS BEFORE

No. 1, NEW CORNING BODY, McLAUGHLIN GEAR,

Imitations of this inimitable gear are numerous. Our competitors all copy after it. This is the original. Body, round corners and beaded. Seat, round corners, solid back moulded. Our designs will be new. Our prices will be right. Our Cutters will be the best.

Wait for our traveller or send for New Catalogue before ordering your

Cutters for 1896.

RULES FOR THE CARE AND PRESERVATION OF WAGONS AND CARRIAGES.

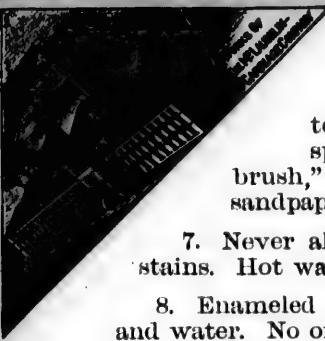

1. Carriages should be kept in an airy, dry coach house. There should be a moderate amount of light, otherwise the colors will be affected. The windows should be curtained, to avoid having direct sunlight strike upon a carriage.

2. There should be no communication between the stable and the coach house. The manure heap or pit should always be located as far away from the carriage house as possible. Ammonia fumes crack and destroy varnish, and fade the colors both of painting and lining. Also avoid having a carriage stand near a brick wall, as the dampness from the wall will fade the colors and destroy the varnish.

3. Whenever a carriage stands unused for several days, it should be protected by a large cotton cover, sufficiently strong to keep off the dust, without altogether excluding the light. Dust, when allowed to settle on a carriage, eats into the varnish. Care should be taken to keep this cover dry.

4. When a carriage is new or newly varnished, it is better for it to stand for a few days, and to be frequently washed and dried off before being used; frequent washings with cold water and exposure to fresh air in the shade will also help to harden and brighten its finish. Never allow mud to remain long enough upon a newly varnished carriage to dry upon it, or spots and stains will invariably result.

5. While washing a carriage keep it out of the sun. Use plenty of water, taking great care that it is not driven into the body, to the injury of the lining. Use for the panels a large, soft sponge; when saturated, squeeze this over the panels, and, by flowing down of the water, the dirt will soften and harmlessly run off. Care should be taken to wipe the surface quite dry with a soft chamois leather after each washing.

6. The directions just given for washing the body apply as well to the under parts and wheels, but use for the latter a different sponge and chamois than those used on the body. Never use a "spoke brush," which, in conjunction with the grit from the road, would act like sandpaper on the varnish, scratching it, and of course removing the gloss.

7. Never allow water to dry of itself on a carriage, as it will invariably leave stains. Hot water or soap should never be used in washing a varnished surface.

8. Enameled leather tops and aprons should be washed with a very weak soap and water. No oil should be put on enameled leather.

9. To prevent or destroy moths in woolen linings, use turpentine and camphor.

10. Inspect the entire carriage occasionally, and whenever a bolt or clip appears to be getting loose tighten it up with a wrench, and always have little repairs done at once. Should the tires of the wheels get at all slack, so that the joints of the felloes become visible, have them immediately contracted, or the wheels may be permanently injured. "A stitch in time saves nine!"

11. Examine the axles frequently; keep them well oiled and see that the washers are in good order. Pure sperm oil is considered the best for lubricating purposes. Castor oil will answer, but never use sweet oil, as it will gum up.

12. Leather top carriages should never remain long in the carriage house with the top down. After raising the top, "break" the joints slightly to take off the strain on the webstay and leather. Aprons of every kind should be frequently unfolded, or they will soon spoil.

PLANET JR."

"PLANET JR." is a trade mark known all over the civilized world and "Planet Jr." goods are everywhere recognised as standard. Other makers offer goods that resemble ours in appearance, (after we show them the idea,) but not in quality. "Planet Jr." goods are therefore stronger, better made, better finished and capable of a much greater variety of work than anything of this sort on the market, and we want live agents in unoccupied territory. We carry stock in Toronto and Detroit to accommodate our Canadian trade and can ship from there or from Philadelphia as desired. Our Cuts show six machines; there are thirty more, (Seed Drills, Wheel Hoes, Cultivators and Harrows,) all described in our 1896 Catalogue now ready. Send for it and for our 1896 trade discount sheet. It won't be dry reading.
